Break Free

[Hundredth](#)

Break FreeHundredthI just want to break free from my misery
Suffocating everyone around me
Choking on my apathy
A disregard for humanity
I'm becoming my own worst enemy
Spit it outForced in by no other than me
Self-inflicted suffering
I just want to break free from my misery
Suffocating everyone around me
Choking on my apathyTear it down
Tear down everything
So I can sgaremy disregard for humanity
Sink back into my [?]
Past and present, Don't you fucking test me
Test meForced in by no other than meI just want to break free from my misery
Suffocating everyone around me
Choking on my apathy
Tear it down
Tear down everything
So I can share my disregard for humanity
Break free
