

# Then I Did

## Rascal Flatts

I thought about callin' you when I got off the plane  
Every time I see this city through the clouds, I get that way  
Call me crazy for missin' you like this, but I do  
By now I figured you had all your numbers changed  
It's been at least a year since I called you up to say  
We need to talk, I got this job and I think I'm goin' to take it  
'Cause I been waiting all my life for a break like  
this  
It's my chance of a lifetime, I just know it is  
I gotta go an' find these dreams it was the last thing that I said  
And then I did  
I can see clear to the mountains as we head up our old street  
I remember how we'd call in sick on days like these  
And turn the music up and roll the windows down, and just drive  
You talked me outta givin' up on myself so  
many times  
Convinced me to get it in while I could, regrets hang heavy on my mind  
You never doubted me, you kept pushin' me  
Sayin' you've been waiting all your life for a break like this  
It's your chance of a lifetime, you just know it is  
You gotta go and find those dreams, it was the last thing that you said  
And then I did  
But you were wrong, love was what I wanted all along  
And now you're gone  
I thought about callin' you when I got off the plane  
Every time I see this city through the clouds, I get that way  
But you were wrong, love was what I wanted all  
along  
But you were wrong, your love was what I wanted all along  
'Cause I been waiting all my life, you gotta go and  
find those dreams  
Find those dreams, you gotta go and find those dreams  
Find those dreams, you've been waiting all your life
