

Liquid State

Muse

Take me for a ride
Break me up and steal what's left inside
And make them pray
The iniquity has died inside and left a scar I'm all red and done
Bring me peace and wash away my dirt
Spin me round and have me to divert
And walk into the light Warm my heart to remind
And hold my head up high
And help me to survive
Kick me when I'm down Feed me poison, for me till I drown
Wake me up before I get á¹—unched out
And fall into the night Warm my heart to remind
And hold my head up high
And help me to survive
