

# Back and Forth (Young Bombs Remix)

## B.o.B

That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night

You know we back and forth all night[Verse 1]

Ooh what you doing now  
I love how you move it there  
Looking mighty good yeah  
Nothing to it but to do it yeah  
Looking just right  
Keep doing all the things I like  
So girl let your hair down

On the floor with your hands in the air now[Pre-hook]

And we don't care, we don't care at all  
No we don't care, we don't care at all  
We knew this was something all along

We don't care, we don't care at all That's right we back and forth all night

You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night

You know we back and forth all night[Verse 2]

Promise you will never leave  
A better man you will never see  
I love what you're telling me  
In the morning right here is where you better be

Don't let go

Buckle up, green light, let's go  
So girl let your hair down

On the floor with your hands in the air now[Pre-hook]

And we don't care, we don't care at all  
No we don't care, we don't care at all  
We knew this was something all along

We don't care, we don't care at all That's right we back and forth all night

You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night[Bridge]  
We gonna dip, then glide, go 'head, back it up  
Then we 'gon left, then right, one step to the front  
Now do the electric slide, don't spill what's in your cup  
And if you feel all right, then go put your hands up[Pre-hook]  
And we don't care, we don't care at all  
No we don't care, we don't care at all  
We knew this was something all along  
We don't care, we don't care at all That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night  
That's right we back and forth all night  
You know we back and forth all night
