It's Over Now

L.A. Guns

Just another night and I'm all alone
An' I wonder where you are, who you're holding?
An' I'm wasting time by the telephone
It gets harder when there's no way of knowingI thought we'd be together someday
There was nothing that could keep away
Could've worked it out somehow but it's over now
Thought you'd be comin' 'round but it's over nowWhen I close my eyes, I can see your face
There was still so much to discover
All the time we shared, can't be erased
Now you're in the arms of anotherI always thought we make it someday
There was nothing that could keep away
Could've worked it out somehow but it's over now
Thought you'd be comin' 'round but it's over nowIf you broke my heart, I can't let it show
I can take the pain, I can't let you go
Some people change, I guess it had to be
Even though you're gone now, you still mean so much to meJust another day, I'm still holdin' on
No matter how I try, I can't shake this feelin'
Yeah, I'm sitting here like nothings wrong
I'm still lookin' for someone to believe inI thought we'd be together someday
There was nothing that could keep me away
Could've worked it out somehow
But it's over nowI thought you'd be comin' 'round
But it's over now
Could've worked it out
But it's over now
