

Make My Day

Davr

Woke up late
World won't wait
So I make my way downstairs
 Mom freaks out
 Please don't shout
 I still have to dry my hair
 I've been up all night
 Just thinking you're the one
 Who's in my dreams
My heart just keeps on jumping
When I think what we could be
 Just go ahead and make my day
You make the world just melt away
When things go wrong and skies are gray
 Just make my day, make my day
 Second bell
 Show and tell
 At my locker down the hall
 Heart in throat
 See your note
 And it turns out after all
 You've been up all night
 Just thinking I'm the one

 Who's in your dreams
Your heart just keeps on thumping
When you think what we could be
 Just go ahead and make my day
You make the world just melt away
When things go wrong and skies are gray
 You just make my day, make my day
 We're holding hands
 We're walking home
 We don't know what to say
 But later on
 I read your text
 You made my day
 Here we go! Ha!
 Just go ahead and make my day

You make the world just melt away
When things go wrong and skies are gray
 You just make my day
 Just go ahead and make my day
 You make the world just melt away
When things go wrong and skies are gray
 You just make my day, make my day
 You just make my day
