Take a Shot

Lovex

I see a thousand corridors
And I've walked through them all
Nowhere an open doorI'm imprisoned by my love
Who is chained by the fears
Affection turned into tearsThere's a part of me that just won't take the pain
There's a part of me that wants to burst into flames and break all the chainsTake a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life
Take a shot
Of my poisonous blood
I'm a fever, I'll burn you up
So you'd better spit me out of your lifeI'm the virus that tears you apart
The disease that sucks the life
Out of your faith heartYou need distance from me
Rush to the arms of solitude
It's the only cureThere's a part of me that just won't take the pain
There's a part of me that wants to burst into flames and break all the chainsTake a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life
Take a shot
Of my poisonous blood
I'm a fever, I'll burn you up
So you'd better spit me out of your lifeCut me out of your life
I wanna see you free of all the hurt that I have caused youTake a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life
Take a shot
Of my poisonous blood
I'm a fever, I'll burn you up
So you'd better spit me out of your lifeSpit me out of your life (x4)
