

Take a Shot

Lovex

I see a thousand corridors
And I've walked through them all
Nowhere an open door I'm imprisoned by my love
Who is chained by the fears
Affection turned into tears There's a part of me that just won't take the pain
There's a part of me that wants to burst into flames and break all the chains Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life
Take a shot
Of my poisonous blood
I'm a fever, I'll burn you up
So you'd better spit me out of your life I'm the virus that tears you apart
The disease that sucks the life
Out of your faith heart You need distance from me
Rush to the arms of solitude
It's the only cure There's a part of me that just won't take the pain
There's a part of me that wants to burst into flames and break all the chains Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life
Take a shot
Of my poisonous blood
I'm a fever, I'll burn you up
So you'd better spit me out of your life Cut me out of your life
I wanna see you free of all the hurt that I have caused you Take a shot
Of my poisonous blood
I've got a fever and it won't drop
As long as you're in my life
Take a shot
Of my poisonous blood
I'm a fever, I'll burn you up
So you'd better spit me out of your life Spit me out of your life (x4)
