Lobotomy

Wackor

I've seen you fighting through the time
I've followed your steps full of pain
Unnamed hero that's challenged the human egoVictim of cowardice
Of strong manipulation
A system that was made to lie and to deceiveScreams of agony
Satisfy the proud
But these screams still echo inside the conscienceContradiction, aggression, desolation, illusionNonconformity takes my mind
Too much injustice to forget so fastMy disgust is greater than my compassion
Feel the pain upon your final hourSelf-blame can't hurt me
Eye for an eye
You receive your just rewardNow I'll live my life with indifference
I've tortured without remorse
I've slaughtered without fearBrain killing brain
Brain killing brain
Brain killing brain
Brain killing brain
