

Two Hand Touch

Hot Rod Circuit

focus why can't you just focus
focus all your time one thing at a time question you answer me with questions you answer me with
lies one line at a time running away what's so funny this time (you run away) what do you care if
we're having a good time (its a two hand touch) attention i need your attention although you never
mention you haven't any time breaking i'm feeling the resistance the complications start the breaking
of my heart full contact two hand touch as i pull you to the ground again.
