

# You Know the Way

## Right The Stars

There's something really close to who you are  
Smoking cigarettes out in your car  
Thinking 'bout the time you lost your mind  
There's always something sneaking up behind

You know the way to go  
You know the way to go

Forget sometimes that life is beautiful  
Sleeping through the dreams that make you whole  
Tell me theres still something that you need  
You know sometimes I wish that it was me

You know the way to go  
You know the way to go  
You know the way to go  
Back home, back home

So come around here I can tell you why  
You got that crazy look there in your eyes  
Its all those things you think that ought to be  
Keep crowding in makes it hard to breath

You know the way to go  
You know the way to go  
You know the way to go  
Back home, back home  
Back home, back home  
Back home
