Legacy

Deadly Nightshade Botanical Society

All the lives that I ever saved
will never amount to the ones I take
never amount to the one I made
Violent dreams with no afterlife
rip it all away to quell a blinding pride
build such a display
you can't believe that I'm insane.

Silent screams are my legacy
Fear the madness inside of me

Buried lives to eternity
If theres a war a famine another discease
What if I could take it all away?
implement my own new life
with no thought to what my dreams prescribe
all along it's just a mind deranged

Silent screams are my legacy
Fear the madness inside of me.
