Tears Have No Name

...and Oceans

Under the dark sky we stand Under heavy rain we walk Your hand in mine, my eyes in tears Here where heaven is forgiven Here where tears have no name [Chorus:] Wet as rain I kiss your tears Tears don't cry They have no name As the dark water pours down Still the tears have no name With no sun in sight We grow like wild summer roses No footsteps left behind All this love built on pain [Chorus] That light, that warm desire The last touch of your cold lips Through the holes of the night We slide in the night In oceans of heaven The tears have no name Our eyes filled with black tears of heaven Flowers drowned in the darkening oceans In solitude we all do the same Coz our tears have no name The angel of my dream I breath your beauty Carried away to the stars Hurt by your cruelty Alone in the rain With tears that have no name
