

# Easy to See

## The Waiting

Oh, we are easy to see, we're all together  
Oh, we are easy to see, we're all together looking at You  
We're barely believing the way that Your face  
Can light up an evening, all together for a glimpse of You  
Trying to be still while You're moving through us Now if You are through, finished saying You're peace  
Could You say it again? Because we don't want to leave  
We're resting in the hollow of Your hand and it's so much  
More than we can stand, every one of us here  
Forever to be changed, together wearing Your name
