Dayglo Reflection (feat. Lana Del Ray)

Bobby Womack

The earth is but a dayglo reflection
A turn that with bring you only light
I'm falling to myself but I'm not broken
Waiting for the day to bring me lightIf everything said everything is everything
The only thing I ever dream is you and me
Cause I break down and I take you down
And I love it every step of the wayWatching from a distant constellation
Eyes that can see the world in changing hues
Visions still unfold in sweet imagining
Time reveals that love's the only truthIf everything said everything is everything
The only thing I ever dream is you and me
Cause I break down and I take you down
And I love it every step of the way
