

# River Of Brakelights

Julian Casablancas

We might be in for a late night  
Stuck in a lava flow of brake lights  
I can hear a rattling bass drum driving back to where it came from  
Sit back

I shop therefore I am the cause, protect me from what I was

Getting the hang of it, getting the hang of it, getting the hang of it, getting the hang of it  
Getting the hang of it, getting the hang of it, getting the hang of it, getting the hang of it  
Timing is everything, timing is everything, timing is everything, timing is everything  
Timing is everything, timing is everything...

I'm at your feet, where critters meet  
Who should be asleep and not crossing roads or highways  
In the afterlife of super cities, rapidly devouring its outskirts  
It's neon octopus arms redecorating late at night

Robot camp for kids who hate sports  
Mothers crying at the airport  
Finding the dreams you left behind to do, waving goodbye your young heart cries for you  
Sit back

You're finding it hard to get very far  
But we were born waiting in line  
Grabbing the future by the eyes

Getting the hang of it, getting the hang of it, timing is everything, timing is everything  
Getting the hang of it, timing is everything, getting the hang of it, timing is everything  
Timing the hang of it, getting is everything,  
Getting the timing of everything hanging is  
Hanging the getting of timing the everything...

Like batteries we die, like rivers we dry  
We fuel and recharge, that's humans and cars  
My fun, my sun, be my homework done  
Where did you go, you were my ride home

Is that what we want, is everything shot, is that what you ask for, 'cause that's what we got?

Nothing stands still

Nothing stands still
