Playlist

Red Wanting Blue

Baby
Baby
BabyEven though your heart makes me nervous
Even though your moves got me wild
Better know your love's on my playlist every time
Even though your heart makes me nervous
Even though your moves got me wild
Better know your love's on my playlist every timeBaby when you look at me
My heart releases butterflies
We lock eyes, our lips, our hands, our hips
And nobody would disguise
We've got a heavy situation here
This is the first song of our new life
Every beat in between you and me
We need to keep it going all nightEven though your heart makes me nervous
Even though your moves got me wild
Better know your love's on my playlist every time
Even though your heart makes me nervous
Even though your moves got me wild
Better know your love's on my playlist every timeBaby will you work with me
'Cause I can't do it alone tonight
Paralyzed my lips with your finger tips
Girl, I'm in need of love tonightWell there's a heavy situation here
This is the first dance of our new life
Every beat in between you and me
We need to keep it going all nightEven though your heart makes me nervous
Even though your moves got me wild
Better know your love's on my playlist every time
Even though your heart makes me nervous
Even though your moves got me wild
Better know your love's on my playlist every timeBaby
Baby
Baby
