Danger

Codeseven

You know you get what you want
You get what you want
Because you look at me
You know you get what you want
Be we float downstream, yeahAll is clear under this translucent skin
But you won't let me in
The shade of your eyes
The shape of your eyesChange the subject while you still can
But it's not gone, no it's not gone
Engage the subject while you still can
But it's not going anywhereAll is clear under this translucent skin
But you won't let me in
The shape of your eyes
The element of surprise
