Baby, You're Right

[Phil Vassar](#)

Well, maybe lately I've been
Acting a little bit strange
And maybe there's
A few things I need to explain
So what if I call you at work for no reason
And I sent you those flowers today?
So what if my friends tell me they never see me
And everyone's sayin' I've changed?
If you think I always think about you
And I dream about you day and night
If you think for a moment, I can't live without you
And maybe I've fallen in love with you
Baby, you're right
Baby, you're right
Somehow, somewhere
I went and crossed over the line
And I let you see
The man that was hiding inside
It's highly irregular, I must confess
No this usually isn't my style
Oh, I know my heart's beatin' out of my chest

And I just can't do nothin' but smile
If you think I always think about you
And I dream about you day and night
If you think for a moment, I can't live without you
And maybe I've fallen in love with you
Baby, you're right
Baby, you're so wrong if you think
That you're holdin' on just a little too tight
But if you're believin' that I'm never leavin' you
Baby, you're right
If you think I always think about you
And I dream about you day and night
If you think for a moment, I can't live without you
And maybe I've fallen in love with you
If you think that I'm hopeless without you
There's no way I can put up a fight
If you think for a moment I can't live without you

And maybe I've fallen in love with you
Baby, you're right
Baby, you're right
