

# Look

**Beth Nielsen Chapman**

For all the tears, all the times I got lost  
For every bridge my heart's crossed Look at how your love has changed my life  
Woke up all the dreams, I've held inside  
All the stars fell in place when you first touched my face  
And once again the world felt right Look at how you knew, you'd found my heart  
Deep out of the blues and torn apart  
Long before I could see you were so meant for me  
You held me in your arms so tight Love finds a way through time and grace  
How sweet to step into this dance  
When I never thought my heart  
Would get a second chance Look at how your love has changed my life  
Filled me with a hope that shines so bright  
That the past closed the book when I turned back to look  
At how your love has changed my life And the past closed the book when I turned back to look  
At how your love has changed my life
