

Venus Complex

LLuther

You can be certainty, you just go the whole way
Every time you're alone you could turn and fall
Cause right from the start she's confusion in sequence
The lies that she tells us are saved up for every single second Does it really make you happy?
You keep pushing
Does it really entertain you?
Continue or take it away
She is venus complex You could stay self contained or you could turn and walk
Cause right from the start she's confusion in sequence
The lies that she tells us are saved up for every single second Does it really make you happy?
You keep pushing
Does it really entertain you?
Continue or take it away
She is venus complex
She is complex I can always say you need me
Hate the self
Ride the sickness
Hate the self
Ride Does it really make you happy?
You keep pushing
Does it really entertain you?
Continue or take it away
She is venus complex
She is complex
