

Thanks for Nothing

Sum 41

I'll never take part in the growing population
Or waste my time with further education
Forget what we know, it's just a big show
What they want to control So jaded frustrated
It's all so complicated
Fashion, no passion
Surrounds me All I know is
I've heard this all before
Reality's a bore
You ask me to believe in something fake Well I can't bring myself to
Do what you want me to
This is who we are and
Nothing's gonna change
Nothing's gonna change I can't take part in the businessman illusion
I'll take my chance in the real world confusion
Don't blame us, who do we trust
When they're so dishonest No patience, this nation's
Obsessed with exploitation
Lying, denying
Surrounds me All I know is
I've heard this all before
Reality's a bore
You ask me to believe in something fake Well I can't bring myself to
Do what you want me to
This is who we are and
Nothing's going to change Don't think you can ignore us
Don't tell me that we're to blame
Don't pick our future for us
Or act like we're the same All I know is
I've heard this all before
Reality's a bore
You ask me to believe in something fake Well I can't bring myself to
Do what you want me to
This is who we are and
Nothing's gonna change Thanks for nothing
I've heard this all before
Thanks for nothing
Reality's a bore Thanks for nothing
It'll never be the same

Thanks for nothing
And nothing's gonna change
