

All You Ever Do Is Walk Away

The Magnetic Fields

Sad as a painted clown, a beautiful boy in an ugly town
But when your circus closes down, don't walk away from me
You've been asleep too long, the birds are bruises in the dawn
The pounds of flesh between us stretch as far as you can see
But all you ever do is walk away and I know if
you'd only go slow
You could see what it means to be making a scene with me
All you ever do is walk away and I think if you tried
You could find a little time for the life I can see in your eyes
Don't go, don't go
Sometimes you just explode and no one alive can break your code
You have a language of your own, an unconnected road
The people you called your friends, the places you won't go again
The decades lost in finding them, you'll have to let them go
But all you ever do is walk away and I know if
you'd only go slow
You could see what it means to be making a scene with me
All you ever do is walk away and I think if you tried
You could find a little time for the life I can see in your eyes
Don't go, don't go
