Quantumleaper

Scar Symmetry

I'm nothing and all things
I drift between dimensions
I'm lifeless, immortal
Collapsed dualityMy language is wordless
A silent scream to your ears
Enigma in plain sight
Time, space anomalyQuantumleaper
Found unfound
Voice of reason
Lost its tongueIf you rise I'll fall, unknown once I was known
Choose where I can't go and I am there
If you rise I'll fall, unknown once I was known
Even when I'm gone you know I'm hereI'm right here and nowhere
Upon me rests creation
I am wave and lepton
The eerie paradoxWrong focus, wrong methods
This way you'll never get me
Exclude flesh, include mind
And drift along with meQuantumleaper
Found unfound
Voice of reason
Lost its tongueIf you rise I'll fall, unknown once I was known
Choose where I can't go and I am there
If you rise I'll fall, unknown once I was known
Even when I'm gone you know I'm hereYou observe me in a grain of sand
Infinity beheld
Universe in the palm of your hand
Infinity unveiledView this progress as an omen
When mind allows, feel it pull you further downQuantumleaper
Found unfound
Voice of reason
Lost its tongueIf you rise I'll fall, unknown once I was known
Choose where I can't go and I am there
If you rise I'll fall, unknown once I was known
Even when I'm gone you know I'm here
