Higher

Parachute

As the sunset fades
Through the window pane
Stars bleed in with the city
Melt off with the rain
Your mind is racing
Your heart won't rest
And the night goes on
Now you have a chance that you can't pass up
It's time to take one shot
Just hope you're ready now
And pray that this was all enough
But you have to wonder
Can you still deliver?
Can you hold the gun?
Could pull the trigger?You gotta go higher
You gotta go higher
Than you ever been beforeSee the spotlight shine
Their eyes focus in
Feel the weight crush down
Around you as the pressure builds
The bell is ringing
And the fight's beginning
Will you take a bow?
Or go down swinging?You gotta go higher
You gotta go higher
Than you ever been beforeHigher and higher
You're gonna take this higher
Higher and higher
You're gonna take this higher
Higher and higher
Oh you're gonna take it all the wayYou gotta go higher
You gotta go higher
You gotta go higher
You gotta go higher
Than you ever been before
