Brave New World

Iron Savior

Just like a machine programmed and build to obey
serving the system in devotion
faithfully day after day
Feels you do not know an unpolluted mind
In a world free of distress
disturbing emotions of any kind
The perfect system to maintain mankind
the department of thoughts it watches your mindBrave, brave new world
of biogenetic design
where the perfect people live perfect lives
and individuals get pulverized
Brave, brave new world
where mankind is down on its knees
to the masterplan of insanity
slaves of science in agony
Brave, brave new worldGenetic engineering created your DNA
codes and patterns lay down your life
define you to obey
Escape the nightmare you can't even dream
Your nature is human - you ain't no machine
Brave,brave new world...Break the chains and free your spirit
start to be alive
Be an individual and rise
And rise!Brave, brave new world...Brave new world
of biogenetic design
in this brave new world
no emotions of any kind
brave new world
you're down to your knees
in this brave new world
the masterplan of insanity
Brave, brave new world
