

Electric Youth

Deborah Gibson

Zappin' it to you, the pressure's everywhere
Goin' right through you
The fever's in the air, oh, yeah, it's there
Don't underestimate the power of a lifetime ahead
Electric youth, feel the power
You see the energy comin' up, coming on strong
The future only belongs to the future itself
And the future is electric youth
It's true you can't fight it, live by it
The next generation, it's electric
We've got the most time to make the world go round
Oh, can you spare a dime?
Place your bet on our sound, come back to town
Don't lose sight of potential mastermind
Remember when you were young
Electric youth, feel the power
You see the energy comin' up, coming on strong
The future only belongs in the hands of itself
And the future is electric youth
It's true you can't fight it, live by it
The next generation, it's electric
We do what comes naturally
You see now, wait for the possibility
Don't you see a strong resemblance to yourself?
Don't you think what we say is important?
Whatever it may be, the fun is gonna start with me
I'm bringing it back
Electric youth, feel the power
You see the energy comin' up, coming on strong
The future only belongs to the future itself
And the future is, electric youth
It's true you can't fight it, live by it
The next generation, it's electrifying
Electric youth, feel the power
You see the energy comin' up, coming on strong
The future only belongs in the hands of itself
And the future is electric youth
It's true you can't fight it, live by it
The next generation, it's electric

It's electric, it's electric
Electric youth, feel the power
You see the energy comin' up, coming on strong
The future only belongs to the future itself
And the future is electric youth
It's true you can't fight it, live by it
The next generation
Inflation, flirtation
Relaxation, elation
Generation of
An electric youth
