Money Changes Everything

Nanci Griffith

In the rush of the river and the roar of the crowd
You can't hear the silence calling
When it's merely a whisper of a cloud
In a crazy storm that pulls you onTake a pill or you might take a loss
And the vicious circle tightens
But compromise comes with a cost
Maybe you can't see but it's clear to meMoney changes everything
It changes everythingMake a little and it makes your day
And the heavens smile upon you
Make a bundle and you're blown away
To a different game and the rules all changeLeave a husband or trade a wife
You're in the bigger picture now
Take a country or take a life
If it's moolah's will there's gold in them hillsMoney changes everything
It changes everything
Money changes everything
It changes everythingIf you think it makes your world go round
It makes your world go round
If you think it makes your world go round
It makes your world go roundMoney changes everything
It changes everything
Money changes everything
It changes everythingIt changes everything
It changes everything
It changes everything
