

Crash Here Tonight

[Toby Keith](#)

I almost said I love you
Could I really be that kind of guy
See one candle burning in your eye
Then watch my heart fill up with butterflies I almost said that I need you
Girl, I shouldn't go there anymore
Act like I never been in love before
You probably think it's my first time Is this what love is all about
Am I getting in too deep
I wouldn't want to freak you out
Make a promise I can't keep So close your eyes and hum along
And I'll sing you one more love song
And if everything is still alright
Why don't you just crash here tonight
