

Count the Stars

Everfound

So afraid
You're gonna break
You try to fix
The things that make you lose control
(Lose control)

The pain you saw
The lies you heard
Knocked you down, face in the dirt
And bruised your soul

Did you ever think
Life would be this way?
Always looking for a change

Try and count the stars
When the world is out trying to steal your heart
Remember something higher
What we see
Is incomplete
Hope will keep you moving on
Cause this is just the start, yeah

Shake the dust
Off your feet
Realize that you are free
To overcome
(To overcome)
There's a dream
There's a place
There's a crown with your name
In the kingdom come

Did you ever think
life could be this way?
That the night could show you grace?

Try and count the stars
When the world is out trying to steal your heart
Remember something higher

What we see
Is incomplete
Hope will keep you moving on
Cause this is just the start, yeah

Oh, oh
Just try to count the stars
Oh, oh

So let your fire rise
And flaunt the sky tonight

So let your fire rise
And flaunt the sky tonight

Try and count the stars
When the world is out trying to steal your heart
Remember something higher
What we see
Is incomplete
Hope will keep you moving on
Cause this is just the start, yeah

Oh, oh
Just try to count the stars
Oh, oh
Just try to count the stars
Oh, oh
Hope will keep you moving on
Cause this is just the start, yeah!
