The Message

Nate James

There is something wrong with sounds today
Never really captured how I feel
and whatever happened to the sounds today
I think they are lacking something realLike them old school jams that kinda make you wanna dance
Lose yourself in music feels so free
Each time I take your stand and turn things 'round
I want you to express yourself through music
and don't hide it and just sing yeah
Let's get it together
Cause music
and that freeness
of thinking is pushing us furtherGot to get up and dance got to get up and move
got to send out my message to the peopleGot to get up and dance got to get in the groove
are you hearing my message to the peopleSo what's going on in life today
People looking down no, they won't say what's up, no
But we can think around and find a way
keep on moving forward and dont give up, no
lets go back in time back to music of my mind
with Stevie playing piano just for youSo what happened to the sounds today
I know that deep down you still love your music
and don't hide it and just sing it
Let's get it together
Cause music and that freakness of thinkin
is pushing us furthergot to get up and dance got to get up and move
got to send out my message to the peoplegot to get up and dance got to get in the groove
are you hearing my message to the people.
