## Lisa

## **Lita Ford**

Lisa, you are the shelter for my soul Lisa, you heal my heart when I lose control As I let my fingers trace Each time worn line upon your face I know only love creates a masterpiece like you I know it's trueLisa, Lisa, say you're gonna live forever Lisa, Lisa, never gonna say goodbye Only you know who I am Only you really understand Nothing's gonna take you awayLisa, I know we live in different worlds Lisa, and I will always be your little girl And on a stormy night You built a rainbow to my door I'll always remember youLisa say you're gonna live forever Lisa, Lisa, never gonna say goodbye Only you know who I am Only you really understand Nothing's gonna take you away from me
