

Never Let You Go (feat. BullySongs)

Dash Berlin & John Dahlbäck

We were living a lie and looking away
Floating inside some outer space
Hurting ourselves and losing control
We were so far gone
But then underneath it all, underneath it all
There's something beautiful like a fallen star
You show me not to let, show me not to let let it go All over again, time after time
I never believed it could be mine
A flash in the dark, when nothing was right
When I'm with you I feel alive
Il never let you go
Il never let you go
Il never let you go
Il never let you go We're splitting the sky with fire in our hearts
And nothing can stop us leaving the past
They try pulling us back and tying us down
We're too far gone
Way up above it all up above it all were
Something beautiful and it's all because you
Show me not to let, show me not to let let it go
All over again, time after time
I never believed it could be mine
A flash in the dark, when nothing was right
When I'm with you i feel alive
Il never let you go
Il never let you go
Il never let you go
Il never let you go
