Burn

Sinnergod

I'm a sucker for the tension
You better soak it before your brain forgets it
Run away, run away, run away with me
You love the attention ... get on your kneesAll the people stand attention
It better soak in coz its the least expected
Hide away, hide away and see
Show me some attention, get on your kneesI can feel it burning from the start
Deep inside my heart
Burn it to the ground, ground, ground
I can feel it burning from the start
Deep inside my heart
Always falling down, down, downI'm a walking love infection
You better face it I'll be your first addiction
Don't turn away, turn away from me
Show me your frustrations...I'm begging please
I'm a sucker for the tension,
You better soak it before your brain forgets it
Run away, run away, run away with me, show me some affection..get on your knees
