

Me & My Girls

Selena Gomez

Drop down on a desert ride
Just outside the 95
Never felt more, more alive
I got my chicas by my side

If we want it, we take it
If we need money, we make it
Nobody knows if we fake it
You like to watch while we shake it
I know we're making you thirsty
You want us all in the worst way
You don't understand
I don't need a man

Me and my girls, me and my girls
Me and my, me and my, me and my, me and my girls
Me and my girls, me and my girls
No jodas, nosotras
Me and my girls
Me and my girls

The night is dark but the moon is bright
We're staring at this summer night
Tan skin looks damn good in white
Stripping down by the Hollywood sign

If we want it, we take it
If we need money, we make it
Nobody knows if we fake it
You like to watch while we shake it
I know we're making you thirsty
You want us all in the worst way
You don't understand
I don't need a man

Me and my girls, me and my girls
Me and my, me and my, me and my, me and my girls
Me and my girls, me and my girls
No jodas, nosotras
Me and my girls

Me and my girls

I'm going home with who I came with
And who I came with's not you
I'm going home with who I came with
And who I came with's not you
I'm going home with who I came with
And who I came with's not you
I'm going home with who I came with
And who I came with's
Me and my girls, me and my girls
You can look, but don't touch
I'm not here to hook up
I'm just here to turn up
Tonight is just us

Me and my girls (tonight)

Me and my girls
Me and my girls
No jodas, nosotras
Me and my girls
