Wildfires

The Limousines

You're forcing me
Using that witchcraft
And sorcery to torture me
It's something we can't control running like a wildfire
Something irrational running like a wildfire
Don't think it's natural running like a wildfire
And we're starting the wildfire
You let it slip
You like me biting on my bottom lip; thunder and lightning
A lick of sweat invite me somewhere we can finish this thunder and lightning
And I don't know how, but you aligned my stars
And somehow forever doesn't seem so far
I don't know how, but you aligned my stars
It's something we can't control running like a wildfire
Something irrational running like a wildfire
Don't think it's natural running like a wildfire
And we're starting the wildfire

It's something we can't control running like a wildfire
Something irrational running like a wildfire
Don't think it's natural running like a wildfire
It's like we're animals, it's like we're animals
Your sight blurs
You can't find the right words well that's fine
Your friends left it's last call
I lit your cigarette and I saw the future in the flames
The future in the flames
It's something we can't control running like a wildfire
Something irrational running like a wildfire
Don't think it's natural running like a wildfire
And we're starting the wildfire
It's something we can't control running like a wildfire
Something irrational running like a wildfire
Don't think it's natural running like a wildfire
It's like we're animals
It's like we're animals
