

# Side By Side

## The Constellations

She left the door wide open  
Note on the floor with a key  
She wrote that her heart's been broken  
And she meant what she said to me  
Woke to the sound of the birds ringing around in my brain  
Bedsheets are frozen, I know this is more than a dream

And I ain't no good at saying goodbyes  
So if you must leave then we'll both go  
Side by side

She left the door wide open  
A pistol lay warm in my hand  
She said that shes gone to find another  
who'll love her and understand  
A breath formed at the window  
And she tried to call out my name  
The first shot was all  
But the second one eased the pain

And I ain't no good at saying goodbyes  
So if you must leave then we'll both go  
Side by side

I left the door wide open  
The note floats around on a breeze  
And it will find us together  
And forever that's how we will be

We left the door wide open...
