

# First Days Of Spring

## Neverending White Lights

Space became empty I returned to a place where nothing grew  
Stealing my way back just to see a face that we never know  
Moving through softly, needing you awake more than anything I'll always have visions just before the first days  
of Spring Feeling my way back just to see eyes, and you never die  
I'm cooling my jets down, this never goes away I never realized  
Stealing my soul back, I love you more than anything I'll always have visions just before the first days of Spring
