Take Me Anywhere

Edwin

She grew up beside me
On the curb where I was walking
She had a way of communicating without talking
She put the feel of God in me, in meShe said, "Honey, just get in the car and ask no questions
Oh and by the way I forgot to mention
You'll be driving from now
You'll be driving from now"Take me anywhere
Anywhere we go is just fine, baby
Take me anywhere
Been around long enough to know that anywhere's better than hereIt was three days later and we pulled up to the border
Where she said, "Baby, I think an apology is in order
'Cause I don't need you anymore
I don't need you anymore"Take me anywhere
Anywhere we go is just fine baby
Take me anywhere
Been around here to long alreadyTake me anywhere
Anywhere we go is just fine, baby
Take me anywhere
Been around here to long alreadyTake me anywhere
Anywhere we go is just fine, baby
Take me anywhere
Been around here to long already
Been around here to long already
