

Dark Clouds

Teenage Fanclub

The wind it haunts the valleys
The rivers running away
The cities and the soil
The pavements, stones and the clayDark clouds are following you
But they'll drift away
I watched the night turning into a dayThe memories, illusions
Are pouring over my mind
The beautiful confusion
A voyage into the nightDark clouds are following you
But they'll drift away
I watched the night turning into a dayThe lovers and the mothers
The summers spent in the sun
The living and the dying
The race is still to be runDark clouds are following you
But they'll drift away
I watched the night turning into a dayDark clouds are following you
But they'll drift away
I watched the night turning into a day
But they'll drift away
I watched the night turning into a day
