

Of A Might Divine (Live At Wacken Open Air 2007)

Haggard

Requiem aeternam et dona eis, Domine Ride, ride, over the land
Sorrow comes without a warning, dear
And do never start to sacrifice your faith
They, they they betray
And poisoned voices creep into your mind
For this will be their final stand Ride, ride over the land!
Outside - a light!
He awakes in the deep of a stormy night
They have come to get him now
A feast for the raging crowd
With torches still alight Alight Suppressed by a might divine
"Your science of the dark"
Revoke what has been told
Or at the break of dawn you will feel the holy spark
Of a might divine La falce della luna in lutto questa notte "Inside - I cry
All I trusted in should die?"
An instrument to ship the blind
Through the sea of ancient times
Of a might divine Now the night breaks
And the final trial awakes
Pressure's getting more and more
Betrayed - all I was living for
Of a might divine Without a warning
Suppressed by a might divine
"Your science of the dark"
Revoke what has been told
Or at the break of dawn you will feel the holy spark
Of a might divine Outside - a light!
He awakes in the deep of a stormy night
They have come to get him now
A feast for the raging crowd
With torches still alight La falce della luna e in lutto questa notte Requiem aeternam et dona eis, Domine
