

Loving You Out Loud

Bad Company

(Written by Simon Kirke) If I kissed you when you least expect it

And take you in my arms, just accept it If I tell you you're what my life's about
When I call you up on the telephone

I'm only loving you out loud And tell you that I'm feeling oh so alone I wanna love you dear inside out(?)
I'm only loving you out loud The times that we spent together Are the best that I've ever known No matter what
the future may bring, baby It's loving you from now on, oh baby If I kissed you when you least expect it And take
you in my arms, just accept it If I tell you you're what my life's about, yeah I'm only loving you out loud You
know I'm only loving you out loud
