

Psychology of Desire (Demo)

Devo

first he took a speck of dirt
and made a man
[made a man]
then he made a woman
from a grain of sand
[grain of sand]
they saw each other
and they got confused
[got confused]
now they get together
but they feel used
[feel used]
magnetic trumpets blowing
synthetic saxophones
the evidence was growing
from below
hidden motivations
buried in the past
still keeps them fighting over
love, love, love
signals start to travel
from a distant place
[distant place]
capture-latches activate
they're face to face
[face to face]
point and circle interlock
and begin exchange
[begin exchange]
lights go out, electroshock
the pleasure pain
[pleasure pain]
magnetic trumpets blowing
synthetic saxophones
the evidence was growing
from below
hidden motivations
buried in the past
still keeps them fighting

over love
the psychology of desire
getting ready for the feast
the psychology of desire
it's the nature of the beast
the psychology of desire
sometimes last but never least
the psychology of desire
boy and girl
both drift apart, they
reconnect [reconnect]
history repeats in order
it must protect
[must protect]
still they get together
cos it does the trick
[does the trick]
even so, they scream and cry
they make each other
sick [sick]
magnetic trumpets blowing
synthetic saxophones
the evidence was growing
from below
hidden motivations
buried in the past
still keeps them fighting
over love
