

Run for Cover

Basia

How well I know this feeling
Seems that you will never learn
It can't go on forever But very soon the tide will turn When it won't go away
And no one else can cover you
I'll shelter you from thunder Run for cover, got to run for cover
When danger is around
Run for cover, got to run for cover
I'll never let you down down down If you play with fire
You're gonna get your fingers burned
Now the stakes are higher
Remember what it was we learned When it won't go away
And no one else can cover you
I'll shelter you from thunder Run for cover, got to run for cover
I'll always be around
Run for cover, got to run for cover
When the sky is falling down down down Everyday I'm getting stronger
On a wave of hope that's going round
There's another world inside my heart
It's not impossible to turn it inside out When it won't go away
And no one else can cover you
I'll shelter you from thunder Run for cover, got to run for cover
When danger is around
Run for cover, got to run for cover
I'll never let you down down down Run for cover, got to run for cover
I'll always be around
Run for cover, got to run for cover
When the sky is falling down down down
