Universal Love

Soul II Soul

I dream of the day of universal lovelife too precious to throw away like a flame it can easily blow away
into the future we're destined to go
time will show you we
already know the way
cultures closely connected all respected none neglected
the dream of love which is universal must happen then we will be one
bring down the wallschorus
everybody listen make a change negative attitudes rearrange
join together forget the hate, the time is now we shouldn't leave it too late
colours never deceive me one family people believe me
brothers and sisters related
ancestrally who needs a barrier
