

Feed Us

Serj Tankian

Maybe we believe she was ready to go
In the morning light
Maybe you believe that she was made of gold
In the east where you killed her
You lead us when you need to feed us
You comfortable delete us when you need your fetus
You cheat us when you feed us with the lie
Stars look out and
Cheat us when you feed us with the lie
Stars look out, goodbye, goodbye
She speaks unrehearsed languages from skin
In the morning light
Painting shadows on the faces of the dead
In front of their windows
You cheat us when you feed us with the lie
Stars look out and
Cheat us when you feed us with the lie
Before it's too late
Do you know that life is ending
As we go, the dots connecting?
We had our chance to save the garden
As it dies our souls will harden
With these words chastising your conscience
We're breaking through and praying for transcendence
But you deceived us all now
Cheat us when you feed us with the lie
Stars look out and
Cheat us when you feed us with the lie
Stars look out and
Cheat us when you feed us with the lie
Stars look out and
Cheat us when you feed us with the lie
The stars look out
