

# Time of Your Life

Robin Thicke

This is the time of your life  
Let's celebrate, not ask each other why  
She's standing there beside you  
Touch her hand let it guide you  
She's just looking for somebody to love This is the moment of your life  
Everything's changed it all gonna turn out right  
We don't know how this little fairy tale ends  
Good thing we will always be best friends  
Well this is the time of your life  
Live it up drink it down  
Get up off the ground, take flight  
If you practice the right moves  
Maybe you'll see  
Everything fits so perfectly  
It's the time of your life, yes it is She wants to know if everybody's looking  
She doesn't know that she's got that thing  
She wants to know if anybody's looking  
She doesn't realize You got that thing baby (you got it got it)  
You got that thing baby (you got it got it)  
You got that thing baby (you got it got it)  
You got that thing baby (you got that thing)  
You got that thing baby (you got it got it)  
You got that thing baby (you got that thing)  
Well I don't know how to spell it or how to say it  
But I think they call it you got that it baby This is the time of your life  
Let's celebrate not ask each other why  
He's standing there beside you  
Let his eyes remind you You're just looking for somebody to love  
Well this is the time of your life You got that thing baby (you got it got it)  
You got that thing baby (you got it got it)  
You got that thing baby (you got it got it)  
You got that thing baby (you got that thing)  
You got that thing baby (you got it got it)  
You got that thing baby (you got that thing)  
Well I don't know how to spell it or how to say it  
But I think they call it you got that it baby Special and wonderful, you got it in your soul  
Anything's possible if you just let it all go  
Anything's possible, yeah the whole world is yours It's the time of your life, woo  
Well I don't know how to spell it or how to say it

But I think as they say in Hollywood you got that it baby  
You got that thing
