Borrowed Time

Augustana

Standing in the doorway of forgiveness
Just like a sinner in the sun
Like the sky above her, she, hard lover
But she don't know which way to run
We're only here, we're only here
We're only here on borrowed time
We're only here, we're only here
We're only here on borrowed time
If I took too much for granted
The dark must come before the light
Like the years that follow, they leave me hollow
God knows I need you by my side
Well, we're only here, we're only here
We're only here on borrowed time
We're only here, we're only here
We're only here on borrowed time
I know my days with you are numbered
When the dust around has cleared
Then you discover I'm a hard lover
You got nothing left to fear
'Cause we're only here, we're only here
We're only here on borrowed time
We're only here, we're only here
We're only here on borrowed time
