endless

Cancerslug

i dont care if the sun burns out
and brings us a new ice age
i dont care if the people die
whore mother natures disgrace
i'll be here burning as always
through their fear
they will not hurt us
no
i dont care if your citys fall
take your pity to the grave
i dont care if the world dies
no more human waste
i'll be here burning as alwasys
through their fear
they can not hurt us
no more
we are lost
they have taken everything
we have thrown ourselves away
we wont see another day
as we cross a thousand aeons
just a few more steps to go
our realities converge inside of thoughts they could never know
on endless winter
