

# Babar (Etienne Jaumet Remix)

## Part Company

I was walking in the street one night  
Just thinking bout the wrong and right  
How it all means nothing  
In the world you left me But I wait for the face to come  
Back in my face now  
Oh I dont care about the sun  
Girl I know what its all about (4x) But the face will come  
Back in your night girl  
But I just dont care about the sun  
The sun  
The sun Back in your night girl  
Well I just cant face it  
The fact that you cant forget  
Wont forget  
But the face will come Back in your night girl  
Well I just cant face it  
The fact that you cant forget  
Wont forget I was walking in the street one night  
Just thinking bout the wrong and right  
And I just dont care about the sun  
The sun  
The sun
